# ABOUT US

## ABOUT US

Our founding partners, who entered the sector in 1995, aimed to develop professionalism, creativity, honesty and the market in order to grow the sector with the realization of medium and large-scale projects in the electricity contracting sector and new technology investments in the country.

The company management, which closely follows the developments in the sector and the new demands in the market, aims to be one of the leading companies in the sector with its strong administrative and financial background. Continuing to implement major engineering projects, in every region of Turkey; has put its signature under many pioneering and exemplary quality, innovative projects. ACK Elektromekanik, which has achieved a serious reputation in its sector by completing the commitments it has undertaken on time and above the expected quality levels, has achieved its current position, thanks to the experience and professionalism of its personnel and the development of its management staff. strategy and organizational success have been effective.

The ACK family adopts as its basic policy to use modern management techniques in all contracting and investment projects, to choose materials and workmanship that have proven themselves in the market and whose quality has been documented, and to complete their projects on time. Regards,
